

Yunqi Li

windylee1029@gmail.com | 626-531-4932

Research Interests

Knot theory, geometric topology, with a current focus on triple (higher order) linking measures for open curves in 3-space.

Education

Arizona State University PhD in Theoretical Mathematics	Expected 2027
California State University, Long Beach MS in Mathematics	2021–2023
California State University, Long Beach BS in Mathematics	2019–2021
Pasadena City College AS in Mathematics; AA in Humanities	2017–2019

Research Experience

Graduate Researcher, Arizona State University	2023–present
• Conduct research in knot theory with a focus of higher-order linking measures for open curves in 3-space. • Investigate geometric and topological approaches to linking invariants and their applications.	

Teaching Experience

College Algebra (MATH 92A, 92B, 112A, 112B) Instructor / Teaching Associate (California State University, Long Beach)	2021–2023
Precalculus (MAT 170) Instructor / Teaching Associate (Arizona State University)	2023

Publications and Preprints

Li, Yunqi, and Eleni Panagiotou. *Triple Linking Measure for Open Curves in 3-Space*. In preparation, 2026.

Presentations

- **Invited Seminar Talk**, *Triple Linking Measure of Open Curves in 3-Space*, University of South Florida, Tampa, FL, April 6, 2026.

- **Invited Special Session Talk**, *Triple Linking Measure of Open Curves in 3-Space*, 2026 Spring AMS Southeastern Sectional Meeting, Savannah, GA, March 28, 2026.
- **Invited Special Session Talk**, *Triple Linking Measure of Open Curves in 3-Space*, Joint Mathematics Meetings, Washington, DC, January 4, 2026.
- **Invited Poster Presentation**, Polymer Modeling and DNA Topology, BIRS, Banff, Canada, November 11, 2025.
- **Poster Presentation**, Arizona Women's Symposium in Mathematics, Flagstaff, AZ, September 20, 2024.

Technical Skills

- LaTeX
- Python
- Mathematical writing
- Proof-based research
